**The best way we can assist is to empower and educate people to help themselves.  
Supporting community-led decision making and provide tailored resources and training for sustainable development and growth.**

### **Livestock Pay-It-Forward Program**

This program transforms a family as well as the wider community. Livestock offspring can be raised which can triple a family's income. As a repayment for this, the family gives back healthy offspring to a neighbour who in turn will do the same.

### **Wheel-chair Supply**

With the little income that many families earn, parents of children with disabilities cannot afford a wheelchair and often carry their children throughout childhood and into their adult lives. The provision of a wheelchair not only brings a greater quality of life for the child, but allows the parents a sense of freedom to complete their everyday tasks.

### **Operation Heartbeat**

This project sponsors life saving operations for many children born with congenital heart disorders such as heart valve failure, hole in the heart, and other coronary disorders.

### **Education and Child Sponsorship Program**

This program provides children with an education, school supplies, uniforms and medical insurance. Young people are also given vocational training in hospitality which will equip them to gain employment.

### **Sanitation and Water Connection Program**

This program supports projects that give access to clean water, and provide improved sanitation and hygiene training for communities.
